Professional Experience

Frontend developer, f3 technologies 07/2023 – Present | Islamabad
Dynamic and result-oriented **Full-Stack Developer** with **4+ years** of experience specializing in building scalable web and mobile applications using **React.js, Next.js, React Native, and Node.js**. Expert in **AI-driven development**, proficient in leveraging **Agentic AI models**, integrating **RAG (Retrieval-Augmented Generation) implementations**, and configuring **MCP (Model Context Protocol) servers**. Proven track record in modern DevOps workflows, including **Azure CI/CD pipelines** and cloud deployments across **AWS and Google Cloud Platform (GCP)**. Adept at driving efficiency by combining core engineering principles with cutting-edge AI orchestration tools.

Education

Software Engineering, Comsats University Islamabad 2019 – 2023 | Islamabad

Projects

Full-Stack & AI Developer F3 Technologies | July 2023 – Present

- **Full-Stack Development:** Engineered and optimized responsive web and mobile applications using **Next.js, React.js, React Native, and Node.js**, resulting in a **15% increase in user engagement** across international projects.
- **AI & RAG Implementation:** Successfully designed and implemented **RAG (Retrieval-Augmented Generation)** workflows and managed **MCP (Model Context Protocol) servers** to connect LLMs with custom data sources, enhancing contextual accuracy.
- **Agentic AI & Productivity:** Mastered **AI-driven development** by utilizing advanced **Agentic AI models**, AI-powered IDEs (e.g., Cursor), and specialized extensions to accelerate development cycles and automate complex coding workflows.
- **Cloud & DevOps Pipelines:** Engineered and maintained **Azure CI/CD pipelines** for automated testing and seamless deployment; managed scalable cloud environments across **AWS** and implemented foundational deployments on **Google Cloud Platform (GCP)**.
- **State & API Management:** Built robust backend architectures using **Node.js** and integrated secure, optimized **REST APIs** with complex frontend state management handled via **Redux Toolkit**.
- **Cross-Functional Collaboration:** Partnered closely with UI/UX designers, backend engineers, and QA teams to deliver production-ready, highly accessible, and pixel-perfect UI dashboards using **Tailwind CSS** and **Ant Design**.

Fashion Valley, Final Year Project

- Developed a state-of-the-art AI-powered e-commerce platform featuring personalized product recommendations driven by the **Apriori Algorithm**.
- Integrated an advanced image-upload system allowing users to search and discover visually similar clothing items instantly.
- Managed the full-stack deployment utilizing **Firebase** and cloud-based asset handling.

Skills

Languages

JavaScript(ES6+) | TypeScript | Python | HTML5 | CSS3 | C++

Databases & Backend

Node.js | Express.js | Django | RESTful APIs | Firebase | SQL | MongoDB

Version Control

Git | GitHub

AI & Prompt Engineering

RAG Implementation | Agentic AI Models | MCP Servers | AI Orchestration

Tools & Version Control

Git, GitHub | VS Code AI Extensions (Cursor, Copilot) | Postman | Apidog

Frontend Frameworks and Libraries

React.js | React Native | Django | Node.js | Redux | Redux Toolkit | Context API

Tools & Platforms

Git | GitHub | RESTful APIs | Firebase

Cloud & Deployment

Microsoft Azure (Deployments & CI/CD Pipelines) | AWS, Google Cloud Platform (GCP Basics) | Vercel, Netlify | GitHub Actions

UI Frameworks

Tailwind CSS | Bootstrap | Material UI | Ant Design | Lucide Icons | Styled Components
